                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           The present invention provides compositions comprising ospC proteins chimeric ospC proteins from members of the Borrelia genus. These may Borrelia burgdorferi, B. afzelli or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and lea to Lyme disease.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Compositions of OspC polypeptides from strains of Borrelia which cause Lyme disease are used to immunize animals and detect immune responses
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Claim 43;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             (UYNY )

These may be Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leads
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Compositions of OspC |

These may Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leaves.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Claim 43; Page 83-84; 160pp; English

These may be Borrelia burgdorferi. B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leads to Lyme disease.

                                                                                                                                                                                The present invention provides compositions comprising ospC proteins and chimeric ospC proteins from members of the Borrelia genus. These may be Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leads to Lyme disease.
                                                                                                                                                                                                                                                                       Compositions of OspC polypeptides from strains of Borrelia which cause Lyme disease are used to immunize animals and detect immune responses

                                                                                                                                                                                                                                                                                                                       Chimeric - I
                           The present invention provides compositions comprising ospC proteins chimeric ospC proteins from members of the Borrelia genus. These may Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and lea
